

smartlife **Hotel Door Locks**

SmartLife offers wide ranges of intelligent hotel door locks and hotel access management solution which is suitable for centralized/distributed hotels.

These smart hotel locks consists of a web-side management system and a tool APP, which includes various practical functions such as room, staff, intelligent hardware control and convenient check-in. These locks can be unlocked via cards and keys.

SmartLife Hotel Locks works with it's gateway device to be connected to the centralized system, and hotels can create, edit and cancel cards using the card encoder. It solves all kinds of problems encountered in hotel management and improves management efficiency. This centralized room and lock management system is the best choice for intelligent management of hotels.
